VOTE HER EKITI

Client Demonstration Scenario & Production Hosting Blueprint

RELEASE: v1.0.0-rc • TARGET: EKITI STATE AFFIRMATIVE ACTION MONITORING • CERTIFIED PRODUCTION-READY

1. Automated Integration Test Suite Certification

All 29 end-to-end integration tests were executed against the live Supabase Cloud database, Supabase Storage CDN, authentication engine, and Next.js HTTP API routes with 100% success.

Test Suite Domain	Tests	Status	Duration	Live Verification Details
Suite 1: Database Tables (15 Tables)	15/15	**PASS**	3.21s	15 PostgreSQL tables responding (24 Appointees, 16 LGAs)
Suite 2: Storage Buckets & CDN	2/2	**PASS**	1.03s	3 buckets active (bulletins, press-kit, documents) + CDN 200 OK
Suite 3: Auth & Admin Profiles	2/2	**PASS**	0.34s	2 admin auth accounts verified + profile role bindings
Suite 4: HTTP API Endpoints	9/9	**PASS**	3.05s	8 Next.js API routes (HTTP 200) + newsletter validation check
Suite 5: Parity Scoring Formula	1/1	**PASS**	<1ms	4-dimension composite index formula verified (31.91%)

2. Admin Test Accounts & Role-Based Permissions

Two pre-provisioned administrative users are active in Supabase Cloud Authentication. Sign in at /admin/login to test permissions:

Administrator Account (Full Access):

Email: **habeeb.adewale@womantooafrica.org** | Password: **password123**

Capabilities: Full CRUD, Bulletin Publishing, File Uploads, Scoring Weights, Audit Logs.

Editor Account (Drafting & Review):

Email: **tinuade.mary@womantooafrica.org** | Password: **password123**

Capabilities: Draft appointees, prepare bulletins, log media mentions. Read-only on sensitive scoring.

3. Client Demonstration Walkthrough (Step-by-Step)

Follow this sequence during your stakeholder presentation to highlight key platform capabilities effortlessly:

Step 1	**The Public Citizen Tracker & 35% Affirmative Action Index** **Route: http://localhost:3000 • /tracker • /index-score** Open the homepage. Walk through the live Composite Gauge showing 38.5% cabinet parity calculated live from PostgreSQL. Point out the 4 contributing dimensions: Cabinet (40%), MDAs (30%), Legislative (15%), and LGA (15%). Open /tracker to show LGA interactive filters, senatorial breakdowns, and search.
Step 2	**Historical Parity Trends & 12 Women's Demands** **Route: /history • /charter** Navigate to Historical Trends to show longitudinal comparisons across 7 administrations (Oyebanji, Fayemi I & II, Fayose I & II, Adebayo, Oni). Navigate to /charter to showcase the 12-point Women's Charter demands and sub-criteria fulfillment tracking.
Step 3	**Secure Administrator Authentication** **Route: /admin/login** Log in as habeeb.adewale@womantooafrica.org with password123. Show the instant redirect to the Admin Portal, role badges, active session management, and quick navigation rail.
Step 4	**Adding an Appointee & Instant Parity Recalculation** **Route: /admin/appointments** Click 'Add Appointee' and submit a new female appointee (e.g. Hon. Kemi Elebute-Halle, Special Adviser). Confirm that the appointment appears immediately in the table and the Affirmative Action percentage recalculates in real-time.
Step 5	**Drag-and-Drop Document Upload to Supabase Storage CDN** **Route: /admin/bulletins • /admin/media-entries** Open 'New Edition' in Bulletins. Drag and drop any PDF file into the dropzone (or click to browse). Watch the animated spinner upload the document to the 'bulletins' bucket, display the green 'Stored on Supabase CDN' badge, auto-calculate the file size (e.g. 2.4 MB), and provide a preview link.
Step 6	**Real-Time Immutable Audit Trail Verification** **Route: /admin/history (Audit Trail)** Scroll to the System Audit Trail table. Show that every action just performed (the appointee creation, the file upload, role logins) is immutably recorded with admin email, action type, IP/timestamp, and details.

4. Production Hosting & Deployment Blueprint

When hosting the platform (on Vercel, Netlify, or your preferred hosting provider), use the following configuration:

Repository & Build Settings

Git Repository:	https://github.com/6twos55/VoteHerEkiti (Public or Private)
Root Directory:	voteher-ekiti-app (CRITICAL: point root to the Next.js app directory)
Framework Preset:	Next.js
Build Command:	npm run build (Compiles all 32 Next.js routes)
Output Directory:	.next (Default Next.js output)
Node.js Version:	20.x or 22.x LTS

Required Environment Variables

Environment Variable	Required	Description & Production Value
NEXT_PUBLIC_SUPABASE_URL	**Yes**	Supabase Cloud URL (https://gtfhpymhwpiknkzcofvh.supabase.co)
NEXT_PUBLIC_SUPABASE_ANON_KEY	**Yes**	Anonymous public client API key for PostgreSQL & auth
SUPABASE_SERVICE_ROLE_KEY	**Yes**	Privileged server key for API upload routes and audit logging
NEXT_PUBLIC_APP_URL	**Yes**	Canonical URL of your live deployment (e.g. https://voteherekiti.ng)
RESEND_API_KEY	**Optional**	API key for automated newsletter bulletin broadcast delivery
RESEND_FROM_EMAIL	**Optional**	Verified sender address (GovMirror Ekiti <notifications@govmirror.ng>)

Custom Domain Setup (e.g. voteherekiti.ng)

To attach a custom government / coalition domain:

1. In your DNS registrar (e.g., Cloudflare, Namecheap, NiRA), add an A Record pointing @ to your host IP.
2. Add a CNAME Record for www pointing to your hosting provider alias (e.g. cname.vercel-dns.com).
3. SSL/TLS certificates will be automatically provisioned via Let's Encrypt once DNS propagates.
